Future Outlook

At present, in line with the implementation of structural reforms in the IMF Agreement, the signs of recovery in macro fundamentals can be witnessed in the economy. This includes the decline in elevated market interest rates, expansion in credit disbursements, deceleration of inflation, pick up in tourism earnings & workers' remittances, appreciation of rupee against USD with forex inflows and rebuilding of reserves by the Central Bank of Sri Lanka.

Amidst the improvement in economic indicators and fiscal discipline, a moderate GDP growth between 1.9% to 3% in Sri Lankan economy can be expected in 2024E against -2.3% in 2023 despite the completion of foreign debt restructuring program on International Sovereign Bonds (ISBs), policy uncertainties owing to Elections and enacting of tough reforms as per IMF agreement such as additional revenue measures underpinning the Budget 2025. Further tax administration reforms, limiting tax exemptions, submission of the new Public Financial Management bill to the Parliament, reforms to further liberalize trade, improve the investment climate and SOE efficiency, reduce gender gaps in the labor market and mitigate climate vulnerabilities. Thus, we would expect that the Sri Lankan authorities will be vigilant and proactive in implementing measures and reforms to achieve the targets before the deadline in order to align with the IMF agreement as well as to build the permanent structural reforms to achieve a sustainable, strong and resilient economy in Sri Lanka.

Currently, the Sri Lankan Government is in the discussion process to conclude the restructuring of ISBs and expecting to complete it during the 3Q2024 followed by an upgrade in country rating along with FDIs to Sri Lanka. We expect the market interest rates to stabilize at current levels despite the present interest rate volatility owing to policy uncertainty surrounding the Presidential Election.

The Fund being a Money Market Fund is invested in a mix of Government securities and Repurchase Agreements within a one-year maturity period. The Managers will continue to monitor the interest rate environment and make changes to the investment profile, to fulfill the Fund objective of providing liquidity while maximizing returns for the investors.
